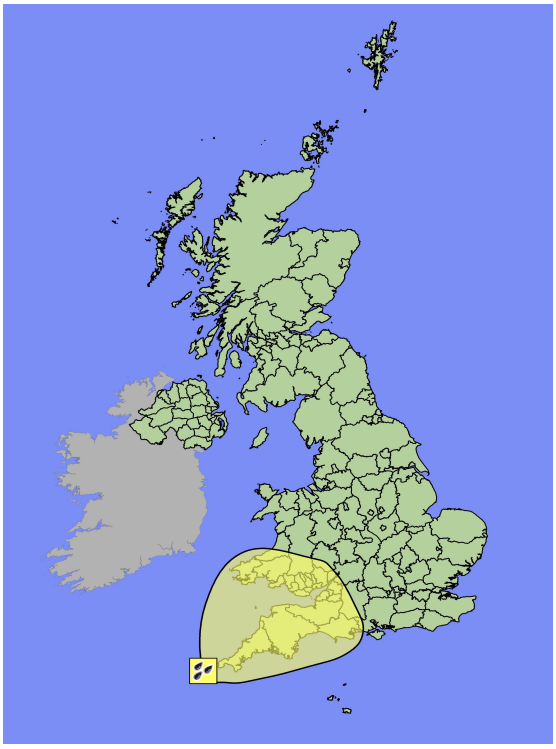
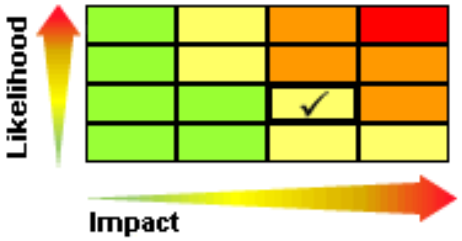
National Severe Weather Warning Service





Chief Forecasters Assessment
The wet spell continues as active frontal systems move across the UK on Boxing Day. A further 20 mm are expected in places, and this is likely to exacerbate existing problems. It will also turn windy with gales on coasts and hills.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **06:00 on Wed, 26th Dec 2012** until **17:00 on Wed, 26th Dec 2012**

An area of heavy rain will move east across the region during the day. The public should be aware that given the continuing saturated state of the ground this is likely to lead to further localised flooding.
